a journal of physics

Volume 24, January–June 1985

CONTENTS

Atomic and Molecular Physics

Perspectives in neutron physics research
P K Iyengar and K Subba Rao 259–278

Risk evaluation and protection against ionizing radiation *V K Jain* 279–292

Electron energy loss spectroscopy (EELS) of organic molecules in vapour phase: Design and fabrication of an indigenous EEL spectrometer
M S Hegde, V Jayaram, P Vishnu Kamath and C N R Rao 293–310

Microwave spectrum of *cis* 3-fluorophenol *A Dutta and A I Jaman* 499–502

Rotational line strengths in $^4\Sigma - {}^4\Pi$ transition of diatomic molecules
T K Balasubramanian and V P Bellary 503–512

CNDO/2 and INDO all valence-electron calculations on the dipole moment of iodine compounds *V Santhanam and J Sobhanadri* 737–741

Compton scattering of 0·279 MeV gamma rays from K-shell electrons of lead *Bhajan Singh, V B Acharya and B S Ghumman* 743–748

Polarised Raman and infrared spectra and vibrational analysis for α-naphthylamine *R Shanker, R A Yadav, I S Singh and O N Singh* 749–755

Inner shell structure of heavy atoms *M P Das and P Nayak* 863–866

Electromagnetic Theory

Four component electromagnet fields and electrodynamics *M T Teli* 485–497

Erratum 544

Experimental Techniques

A quasi random search technique for functional fitting of detector responses *Tapas Bandyopadhyay and P K Sarkar* 643–655

A high pressure-high temperature cell for electrical resistivity studies *Mohammad Yousuf, P Ch Sahu and K Govinda Rajan* 825–835

General Relativity and Cosmology

An isotropic cosmological model in general scalar tensor theory *N Banerjee* 701–706

Tachyons in general relativity *V S Gurin* 817–823

Instrumentation

A programmable digital pulse generator for pulsed NMR spectroscopy *R S Chaughule, L C Gupta and S M Telang* 537–544

Letter

Triangle anomaly free weak interaction with two neutral currents *C V A V B Chandra Raju* L657–L661

Liquid Physics

Dielectric relaxation of some heterocyclic compounds in highly viscous media *Rajni Misra, Amar Singh, J P Shukla and M C Saxena* 911–916

Mathematical Physics

Third and fourth order invariants for one-dimensional time-dependent classical systems *R S Kaushal* 663–672

Nuclear and Particle Physics

Angular momentum and isospin properties of chiral fields *Klaus Goeke and J N Urbano* 53–62

Relativistic harmonic confinement of quarks and gluons *S B Khadkikar* 63–68

Isobaric degrees of freedom in nuclei as determined from non-relativistic quark model *C S Warke* 69–76

The fifth interaction: universal long range force between spins *T Pradhan, R P Malik and P C Naik* 77–94

Bethe-Salpeter dynamics for two-photon processes
A N Mitra, N Nimai Singh and R Ramanathan 95–108

Adiabatic time-dependent Hartree-Fock theory with the consistency condition *A K Mukherjee and M K Pal* 109–117

Nucleon transport processes in fission and heavy ion reactions
S S Kapoor and V S Ramamurthy 119–130

Angular distribution in ternary fission *M M Sharma and G K Metha* 131–136

Radiochemical studies on fission of actinides *M V Ramaniah* 137–153

Studies of light-charged particle emission in fission at Trombay
S S Kapoor and D M Nadkarni 155–164

Development of thermal reactor lattice physics methods
B P Rastogi and H C Huria 165–177

Special features of the safety and control systems of the *Dhruva* reactor
A K Ray and S N Seshadri 179–192

Physics and engineering aspects of fast reactor safety
C V Sundaram and S M Lee 193–210

Engineering development and safety back-up for nuclear power programme *P R Dastidar and A Kakodkar* 211–226

Accelerator development in India *A S Divatia and C Ambasankaran* 227—244

Phenomenology of the Pokaran PNE experiment
R Chidambaram, S K Sikka and Satish C Gupta 245–258

Decays of W and Z in the broken-colour model
S Lakshmibala, G Rajasekaran and S D Rindani 423–427

Pion-proton elastic scattering at 200 GeV/c
Mohammad Saleem and Fazal-e-Aleem 429–433

Fields with vanishing colour-currents
G Rajasekaran, V Srinivasan and M S Sri Ram 435–442

Change of confinement scale in nuclei and the EMC effect
Sourendu Gupta 443–456

On the classical solution of SO(3) gauge theory and 't Hooft-Polyakov monopole *R Parthasarathy, T S Santhanam and K H Mariwalla* 457–460

Low-lying vibrational states of $^{145, 147, 149}$Nd *Ramen Majumdar* 461–473

Annealing of $^{132}_{54}$Xe ion tracks in Lexan and Makrofol plastic track detectors *S M Farid* 475–484

Fractionally charged non-leaking dyons and fermions in a bag *S M Roy and Virendra Sing* 611–618

Ground state baryon magnetic moments and nucleon axial vector coupling *Pashupati N Pandit and M P Khanna* 619–628

^{51}V$(p, n)^{51}$Cr reaction from E_p 1·9 to 4·5 MeV *S Kailas, S K Gupta, S S Kerekatte and C V Fernandes* 629–635

Pre-equilibrium emission effect in (n, p) reaction cross-sections at 14·8 MeV *J P Gupta, H D Bhardwaj and R Prasad* 637–642

Quark-pion coupling constant in a chiral quark model *N Barik and B K Dash* 707–713

R-matrix plus potential analysis of unbound states of ^{33}S *Rama Das and S N Mukherjee* 715–726

On the peripheral nature of the target fragmentation phenomena *M Satpathy and L Satpathy* 727–736

Classical solitons with no quantum counterparts and their supersymmetric revival *R K Kaul and R Rajaraman* 837–845

Some consequences of global horizontal symmetry *V Gupta* 847–852

Bosonic loops and gluon condensate *S Misra and B B Deo* 853–862

Quantum Mechanics

Two-mode para-Bose number states *G M Saxena and C L Mehta* 583–589

Coherent states of a damped harmonic oscillator *S K Bose, U B Dubey and V N Tewari* 591–594

Schwinger's action principle, supersymmetry and path integrals *S P Misra and Tapàswini Pattnaik* 595–600

Entropic formulation of uncertainty relations for successive measurements *M D Srinivas* 673–684

Eigenvalues of the $\mu x^2 + \lambda x^{2m}$ interaction *R N Chaudhuri and B Mukherjee* 685–693

Exact energy eigenvalues by summation of the JWKB series
M Seetharaman, S S Vasan and S Ravichandran 695–699

Photon emission from non-oriented spin systems
G Ramachandran and V Ravishankar 813–816

Quantum Physics

Quantum supersymmetric generalisation of Bogomolnyi bounds
R Rajaraman 1–14

Special topics in the quantum theory of angular momentum
K Srinivasa Rao 15–26

Modified perturbation series for the anharmonic oscillator using linearization technique *Nazakat Ullah* 27–29

On the Feigenbaum-Cvitanović equation in the theory of chaotic behaviour *Virendra Singh* 31–47

Quantum chaos and fluctuation properties of regular and irregular spectra *Jitendra C Parikh and Vijay B Sheorey* 39–45

Self-energy effect in a relativistic bound state problem
S N Biswas and Ashok Goyal 47–51

Solid State Physics and Materials Science

Neutron diffraction studies of transition metal nitrides
N S Satya Murthy, S K Paranjpe, Marsongkohadi, Kurniadi Sumaamidjaja and M R L N Murthy 311–316

Melting in two dimensions—the current status
G Venkataraman and D Sahoo 317–350

Defect structure studies using positron annihilation spectroscopy
R Krishnan and D D Upadhyaya 351–360

Radiation-induced structural changes in alloys
K Krishan and C V Sundaram 361–381

X-ray photoelectron spectroscopy for surface film analysis in corrosion research *P K Chauhan, H S Gadiyar and R Krishnan* 383–395

Irradiation behaviour of nuclear fuels *P R Roy and D N Sah* 397–421

The effect of soft modes on solitons in a linear lattice
V Narasimha Iyer and K S Viswanathan 513–519

Influence of magnetic field on the photorefractive effect in $LiNbO_3$ crystals *S K Arora, G S Trivikrama Rao and E M Uyukin* 521–525

Effect of thermal pressure in converging detonation waves
V P Singh 527–535

Laser Raman spectroscopic study of ferroelastic $LiCsSO_4$
B Raghunatha Chary, H L Bhat, P Chandrasekhar and P S Narayanan 545–557

Dynamical scaling for spin waves in dilute ferromagnets
Deepak Kumar 559–562

A mean-field, effective medium theory of random binary alloys IV. The Heisenberg model with competing interactions and the mixed phase
A Mookerjee and S B Roy 563–574

AC and DC electroluminescence in CaS: Cu, Sm phosphors
S Bhushan and F S Chandra 575–582

Electron-ion interactions in close packed metals *V Ramamurthy* 757–771

Frequency moments and energy shifts for dilute Mössbauer impurities in metallic solids *S K Roy* 773–780

Effective thermal conductivity of granulated two-phase systems at interstitial air pressures *R N Pande and D R Chaudhary* 781–786

EXAFS study of intermetallics of the type RGe_2 (R = La, Ce, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er and Y) Part I: Determination of Ge-Ge distances
A R Chourasia, V D Chafekar, S D Deshpande and C Mande 787–796

Anisotropic spin-glasses with broken replica symmetry
P Deo and S Mishra 797–811

EXAFS study of intermetallics of the type RGe_2 (R = La, Ce, Pr, Nd, Sm, Gd, Tb, Dy, Ho, Er and Y) Part II: Determination of Ge-R distances
A R Chourasia, V D Chafekar and C Mande 867–873

Focussing and defocussing of ballistic phonons in diamond and Nb_3Sn
A Pushpahasan and K S Viswanathan 875–886

Indentation studies of alkali halides at elevated temperatures
K Kishan Rao and D B Sirdeshmukh 887–893

Electrical and photoelectrical studies of plasma polymerized acrylonitrile *Sujata B Dake and S V Bhoraskar* 895–903

Plasmon dispersion and linewidth in aluminium *R K Pal and D N Tripathy* 905–910

Spectroscopy

Electroluminescence and N_2 laser excited fluorescence of high field electrofromed castor oil and liquid paraffin *S M Pillai and C P G Vallabhan* 601–610
